

Vanquish

VQ60

2026 / 2027

At Vanquish, exclusivity is intentional.
From hull to helm, every decision amplifies
performance, purpose, and personal expression.
We build for those who refuse the ordinary.

**CRAFTED
FOR THE
FEARLESS**

YOUR VERSION OF EXTRAORDINARY

In a sea of sameness, we build for those who refuse to follow. Every hull, every curve, every weld is an act of conviction. Dutch craftsmanship applied without compromise. We don't build yachts to blend in. We build them to break boundaries. High performance, bold design, singular craftsmanship: not goals but starting points. Your Vanquish is the ultimate expression of your individuality.

**Not for everyone.
And proudly so.**

THE ART OF ALUMINUM

Lighter. Stiffer. Faster. And impossible to copy.

Building in aluminum gives two absolute advantages. First, it creates an incredibly stiff and lightweight hull, which results in effortless handling and confident performance. Second, it gives us the flexibility to build the yacht around you, tailoring every detail to your personal wishes.

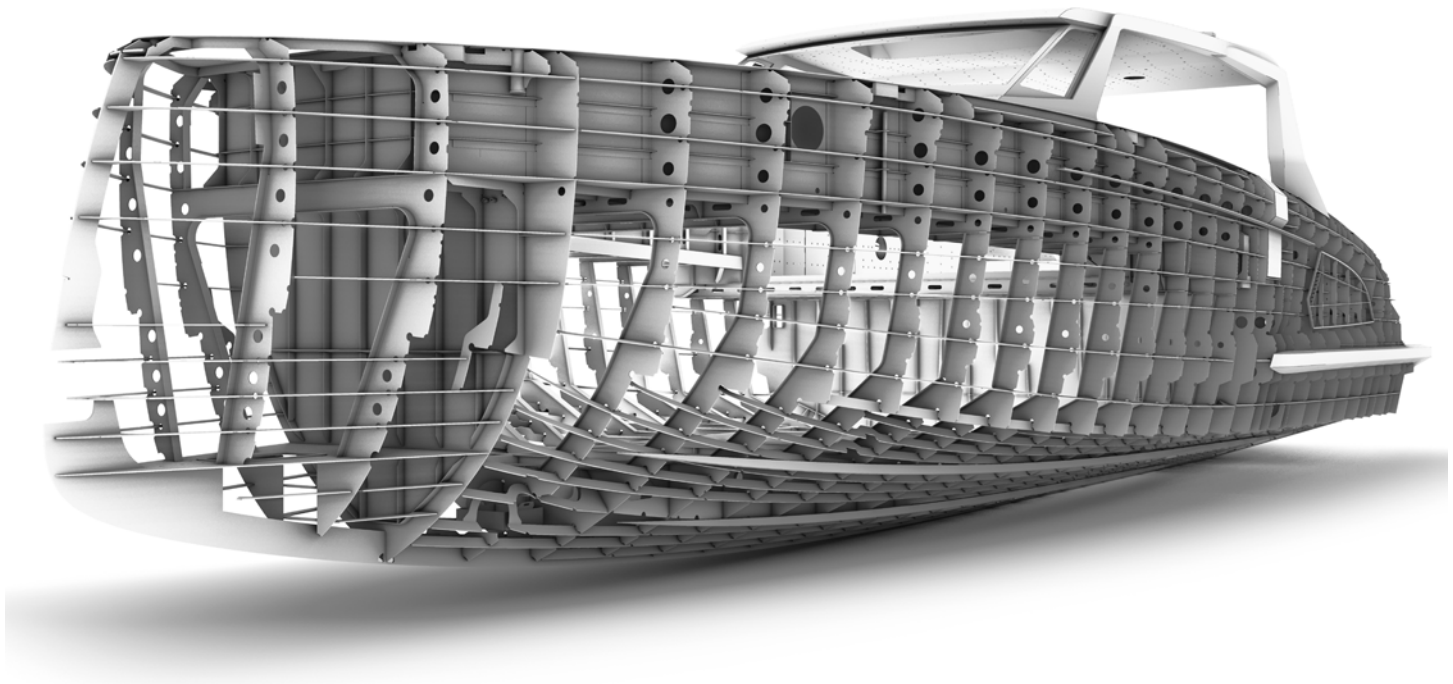

Our fanatical welding standards create a rigid structure. Paired with our signature underwater hull design, this ensures the hull stays stable on the water and the reverse bow cuts effortlessly through the waves.

Customization as a structural fact.

At Vanquish, customization isn't an afterthought but a starting point. From the interior layout to the last stitch of Alcantara, we craft your yacht to your vision. Every line is a decision. Every finish, a choice. Every detail, your version of extraordinary.

Not adjusted to fit you. Built for you.

Every aluminum Vanquish is hand-built in the Netherlands. Aluminum allows us to design deck, seating, and interiors directly around your lifestyle. No compromises.

VQ60

THE ULTIMATE ENTERTAINER

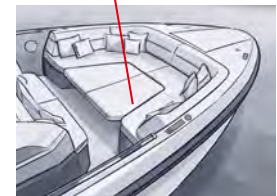

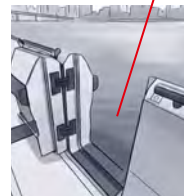

The Uncompromising Synthesis.

You don't compromise. Neither do we. The VQ60 fuses the high-energy hosting capabilities of our open-deck entertainers with the offshore authority and long-range comfort of our aluminum Sport Yachts. It is a driver's boat that transforms into an expansive social platform the second the anchor drops. Built for those who go their own way.

Two Bloodlines. One Unrivaled Machine.
Convention says you must choose: the extreme speed and wide-open deck space of an entertainer, or the aluminum rigidity and overnight comfort of a classic cruiser. We reject the premise. The VQ60 merges the defining features of our VQ55 and VQ58 into one unrivaled machine.

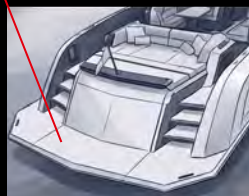

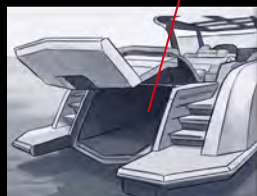

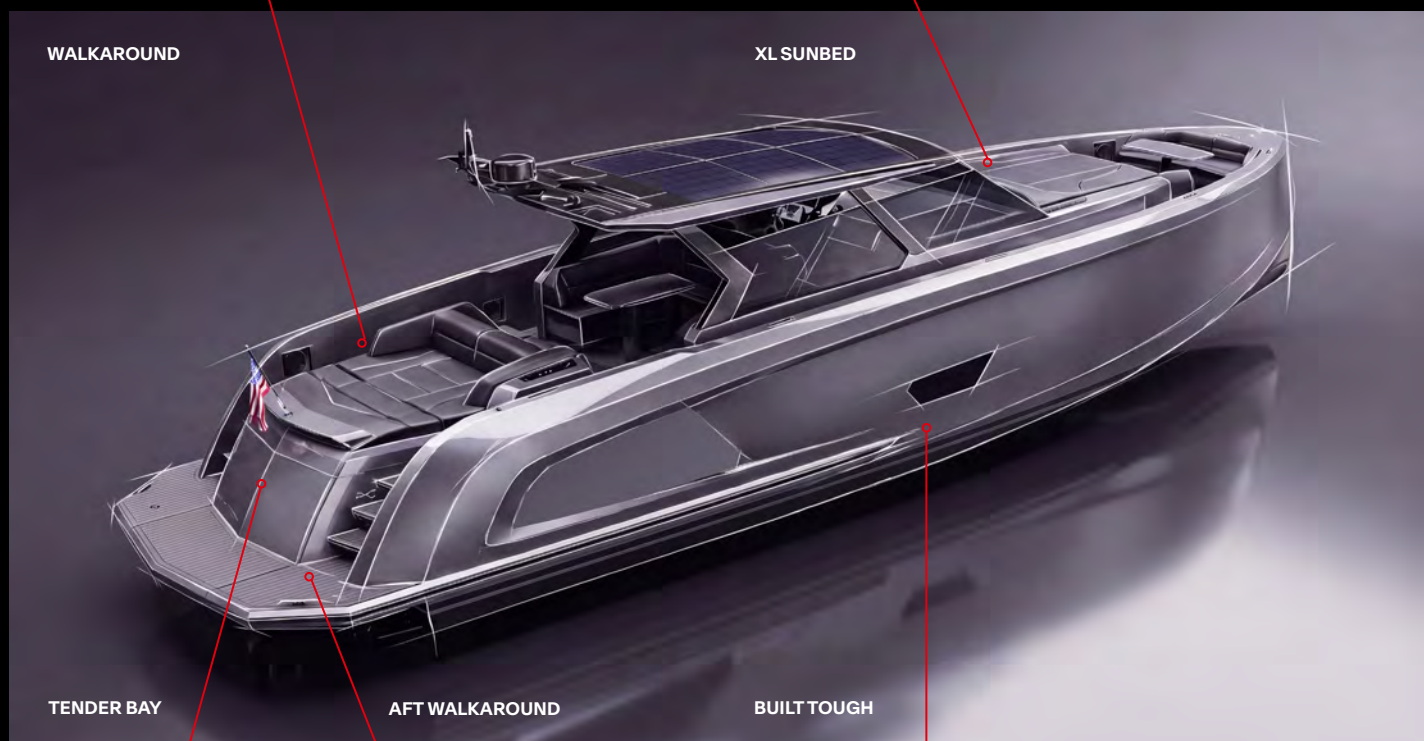

The Entertainer's DNA.

We engineered the VQ60 with the most successful features of the VQ55. These include the spacious, single-level deck and the protective full-beam roof. The layout offers an impressive four-seat center console, a fully equipped wet bar and spacious midship dining setup. Forward, the bow lounge includes a height-adjustable dining table. It brings the perfect hosting layout of the VQ55 directly to the VQ60.

The Offshore Confidence.

We brought the structural foundation and lounging comfort of the VQ58 directly to the VQ60. It starts with our signature aluminum hull and our iconic VQ triple spray rails. On deck, large sunbeds at the bow and stern provide the optimal lounging space. Thanks to the full walkaround design, you and your guests have easy access to the spacious swim platform from both sides. And to complete the ultimate day out, a supersized garage easily stores your gear.

Sensory Dominance.

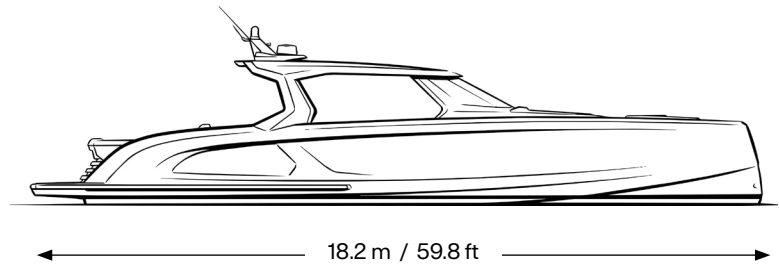

Sensory Dominance is not part of the aluminum hull or from the VQ58. It's an extra feature of the VQ60. We heavily insulated the Engine room and installed a premium multi-zone audio system. The result is clear sound with limited background noise. Adrenaline without the noise.

Absolute Command. Effortless Control.

We optimized the VQ60 for maximum stability and refined control. Docking and maneuvering are effortless, even single-handed. Adrenaline should never mean exhaustion.

MAIN DECK

**Safe & Secure.**

The center console is equipped with four ergonomic seats. For your guests, high gunwales and seamlessly built-in handrails ensure safe movement across the entire walkaround deck, even at high speeds.

Built For The Event.

Entertain without limits the moment the anchor drops. The bow lounge provides comfortable seating and a spacious table for uninterrupted conversations. The midship serves as an ultimate hangout, featuring a central table right next to the fully equipped wet bar. Aft, a massive sundeck flows onto the large swim platform. After a swim, you and your guests can dry off on the extensive sunbeds located at both the bow and stern.

The Supersized Garage.

Maximum storage without sacrificing deck flow.
The garage easily accommodates your 3.5-meter / 12
feet tender. Instant dispatch, on your terms.

LOWER DECK

The Sanctuary Below.

Performance and entertainment above, absolute peace of mind below deck. The L-shaped galley connects directly to a spacious lounge, creating a refined, quiet interior experience. The lower deck is designed as a luxurious retreat.

Smart-Yacht Logic.

The domestic systems are built around your convenience. Choose from pre-programmed configurations to control the yacht's domestic systems with a single touch.

The Master Suite. A spacious cabin anchored by premium textures. Built for spontaneous weekends and extended escapes. Smartly designed, functional closet space maximizes the room and removes the clutter.

Elevated Privacy.

Designed by the Dutch, built for the tall. The enclosed rain shower delivers well over two meters of standing height. Comfort without compromise. Not adjusted to fit you. Built for you.

**Tailored Refinement.**

Your ideal setup is our starting point. We partner with you to shape the exact interior layout. Finished entirely to your specifications, every detail elevates the space, keeping the cabin immaculate and effortless to navigate.
